Re: Thanks to King Construction Services Inc.

To Whom It May Concern:

I am writing to recommend King Construction Services Inc. as a qualified and reputable General Contractor. Over the last 12 years I have worked with Justin King and associates on planning and completion of multiple construction projects from new builds to remodels and repairs. I found their work ethic, finishing standards, and professionalism second to none. King Construction Services produces premium work in a timely manner often meeting or exceeding deadlines and expectations.

No job has proved too difficult for the King Construction team, their ability to adapt to many different building situations and remain detail focused makes the construction process less burdensome for an owner. Their vast experience and large resource pool makes them the right choice for assistance in planning for a project and dealing with any unexpected items that arise during construction.

King Construction recently completed full remodels of two of our Dunkin locations. The project scopes were all-inclusive with full demo to studs, and a complete rebuild interior and exterior. The timeline was unrealistic, each remodel was scheduled to start and be completed in 14 days. There were numerous high level builds including tile work, HVAC, special system implementation, marketing and other unique installations. Their Project Manager handled everything with ease, coordinating subs and materials flawlessly. To top things off the first remodel was completed on schedule despite occurring during a hurricane!

I highly recommend King Construction Services as a General Contractor whom I will not hesitate to use in the future. Their speed, quality of work, and diversity of expertise far exceeds expectations.

Respectfully,

Thomas Michaud Jr.

CEO, Dunkin Machias/Calais

Executive Director, Sunrise Opportunities
